Test Update 800

Posted Date 03/16/2022
Effective Date 03/15/2022
Test Name CMV Resistance: Maribavir, Ganciclovir, Foscarnet, Cidofovir
Update Type Test Code Change
CPT Code 87910

TEST UPDATE

Cytomegalovirus Antiviral Resistance

Order Code: VCAVR

New Order Code: VCMR4

Fee Code: AA382

Reference Laboratory: Viracor Eurofins 33126

Please note that Viracor Eurofins has updated their CMV Resistance assay. MLabs has inactivated order code VCAVR effective March 15, 2022. This code will be replaced by new order code VCMR4 (available 3/29/22). The updated test includes interpretation of gene mutations and association with antiviral resistance, including maribavir, ganciclovir, foscarnet, and cidofovir. CMV sequencing analysis provides information about selected locations in two genes, UL54 and UL97 involved in CMV antiviral resistance.
