OUR COMMITMENT TO YOU

Thank you for considering MLabs in the Department of Pathology at Michigan Medicine for consultation services in anatomic and hematopathology.

MLabs is dedicated to providing world class consultative services by nationally recognized and accessible faculty. Our goal is to help you meet demands in your own practice for rapid and accurate pathology results by delivering the expertise of our faculty in a way that is personal, collegial and supportive.

Our commitment to you is a strategic partnership with one of this country’s largest and most successful academic departments of pathology and a reference laboratory division that is passionately committed to service excellence that includes on-time delivery of effective and comprehensive reports.

Anatomic and Hematopathology Consultation Service
Our distinguished faculty comprise one of the largest and strongest groups of diagnostic pathologists in the world. Receiving more than 15,000 referrals for expert opinion annually, they offer valuable consultative services to referring pathologists to facilitate patient care and education while supporting effective communication with clinicians and patients. Support includes a full range of anatomic pathology diagnostic services including cutting edge molecular diagnostics, a large menu of immunohistochemistry stains, electron microscopy, digital imaging and image analysis. Consultations and second opinions are provided in all subspecialties with each interpretation communicated by fax and frequently a phone call to the referring pathologist at the time of report sign out. Most diagnosis are rendered within 24-48 hours of receipt. We will call you if additional studies are needed and that may delay the final diagnosis.
