ANATOMIC AND HEMATOPATHOLOGY

Madelyn Lew, M.D., MHPE is a Clinical Associate Professor at Michigan Medicine where she participates in Cytopathology and Genitourinary Pathology clinical services. Her research interests focus on optimizing diagnostic accuracy in cytologic specimens, with special attention to immunohistochemistry, diagnostic pitfalls, and the impact of classification scheme implementation on diagnostic concordance with subsequent histology specimens and among pathologists. She is also interested in medical education and serves as the Director of Medical School Pathology Education Curriculum and Director of Pathology Clerkships. She aims to foster student engagement with pathology through innovative curricular design and the promotion of active learning strategies in preclinical and clinical learning environments.

OUR SERVICES

- Bone and Soft Tissue Pathology
- Breast Pathology
- Cardiovascular Pathology
- Cytopathology
- Dermatopathology
- Endocrine Pathology
- Forensic Pathology
- Gastrointestinal/Hepatic Pathology
- General Surgical Pathology
- Genitourinary Pathology
- Gynecologic Pathology
- Head and Neck Pathology
- Hematopathology
- Neuropathology
- Ophthalmic Pathology
- Pediatric and Perinatal Pathology
- Placental Pathology
- Pulmonary Pathology
- Renal Pathology

Judicious and Clinically Relevant Ancillary Testing

Consultation cases are frequently the most challenging cases encountered in any practice. While many consultations can be accurately diagnosed with the materials received, a portion will require additional ancillary tests. The most frequently utilized ancillary tests are immunohistochemistry (to confirm diagnosis) and molecular testing (to confirm diagnosis or guide treatment). Ancillary tests may increase the cost of consultation, but often reduce the overall cost of care by reducing repeat procedures and use of less effective treatments.

MLabs faculty are judicious in the use of ancillary tests, keeping in mind the value of the test to the patient and the cost of the test to the healthcare system or client. We do this because the care we offer to you and your patients is the very same care that we offer to our own Michigan Medicine patients in an environment that values collaborative, multidisciplinary, and cost-effective care.

SUBMIT A CONSULTATION TODAY

1. Call us at **800.862.7284** to request a Slide and Block Kit and requisition.
2. **Send tissue and slides/blocks to:**

Michigan Medicine Laboratories (MLabs)
N-LNC Specimen Processing
2800 Plymouth Rd, Bldg 35
Ann Arbor, MI 48109-2800

*WE WILL CONTACT YOU IF ADDITIONAL STUDIES ARE NEEDED THAT MAY DELAY A DIAGNOSIS.

WE LOVE A CHALLENGE

At MLabs, we encourage our clients to challenge us with their most difficult, perplexing cases.

A passion for discovery and breakthrough science has been a hallmark of pathology at the University of Michigan for more than a century. Partnering with MLabs means tapping into that passion to answer your toughest questions.

We offer a full range of pathology services, including cutting edge molecular diagnostics, a large menu of immunohistochemistry stains, electron microscopy, digital imaging and more. Consultations and second opinions are communicated by fax and are often accompanied by a phone call to the referring pathologist to address questions and help prepare for conversations with providers and patients.

Challenge us. We will guide you to the right test and deliver comprehensive, actionable results, emphasizing collaboration and personal service every step of the way.

A handwritten signature in black ink, appearing to read "Julia Dahl".
