

THE IMPORTANCE OF CRITICAL VALUES FOR PATIENT SAFETY

COMMUNICATION

LIFE THREATING CRITICAL VALUES

MLabs will reach out by phone when a potential life threatening critical value is identified. We are happy to follow up with a faxed result as needed.

Update your critical value contacts information by calling our client services team 800.862.7284

TIMELINESS

CAN YOU BE REACHED...

**MORNINGS?
LUNCH HOUR?
NIGHTS?
HOLIDAYS?**

24/7

MLabs will reach out to you immediately when a critical value is identified 24/7.

DID YOU KNOW?

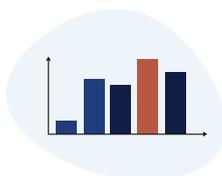

98%

of patients will have treatment modifications based on critical values¹.

30/wk

the average number of critical values that MLabs identifies and calls on each week.

COMMON TESTS FOR CRITICAL VALUES

- Platelet Count
- Potassium
- Glucose
- Total Bilirubin
- Sodium
