

## **Test Update 800**

**Posted Date** 03/16/2022

**Effective Date** 03/15/2022

**Test Name** [Cytomegalovirus Antiviral Resistance](#)

**Update Type** [Test Code Change](#)

**CPT Code** 87910

### **TEST UPDATE**

#### **Cytomegalovirus Antiviral Resistance**

Order Code: VCAVR

New Order Code: VCMR4

Fee Code: AA382

Reference Laboratory: Viracor Eurofins 33126

Please note that Viracor Eurofins has updated their CMV Resistance assay. MLabs has inactivated order code VCAVR effective March 15, 2022. This code will be replaced by new order code VCMR4 (available 3/29/22). The updated test includes interpretation of gene mutations and association with antiviral resistance, including maribavir, ganciclovir, foscarnet, and cidofovir. CMV sequencing analysis provides information about selected locations in two genes, UL54 and UL97 involved in CMV antiviral resistance.
