

## **Test Update 824**

**Posted Date** 11/23/2022

**Effective Date** 12/22/2022

**Test Name** [Erythrocytosis Evaluation](#)

**Update Type** [Test Code Change](#)

### **ORDER CODE CHANGE**

#### **Erythrocytosis Evaluation, Whole Blood**

Order Code: REVE1

Reference Laboratory: Mayo REVE1

New Order Code: REVE2

New Reference Lab: Mayo REVE2

Effective December 22, 2022, Mayo Clinic Laboratories will replace test ID REVE1 with test ID REVE2. Due to assay performance issues, profile components Oxygen Dissociation P50 (P50P) (CPT 82820) and P50 Shipping Control Vial (CTRL) will be removed and become obsolete on this date as well. This test is used for definitive, comprehensive, and economic evaluation of an individual with JAK2-negative erythrocytosis associated with lifelong sustained increased hemoglobin or hematocrit.
