

## **Test Update 839**

**Posted Date** 04/12/2023

**Effective Date** 04/12/2023

**Test Name** [Myeloid NGS Panel](#)

**Update Type** [Miscellaneous](#)

### **UPDATED TESTING ALGORITHM**

#### **Myeloid NGS Panel**

Order Code: MYENG

Fee Code: NA105

CPT Code: 81450, G0452-26

New Fee Code: NA105, NA010, NA011

New CPT Code: 81450, 81245, 81246, G0452-26 x2

Effective April 12, 2023, ordering of the Myeloid NGS Panel includes a result for both an NGS panel and a separate single-gene test for *FLT3* mutations using multiplex PCR and capillary electrophoresis. The *FLT3* result is reported prior to the result for the full NGS panel and is now billed with separate charges (CPT 81245, 81246, G0452-26). Separate *FLT3* testing enables faster resulting for this gene which is important for the potential use of FLT3 inhibitor therapy. In addition, this separate testing enables quantification of *FLT3* allelic ratio.
