

## **Test Update 858**

**Posted Date** 10/18/2023

**Effective Date** 10/10/2023

**Test Name** [Metamycoplasma hominis PCR, Various Sources](#)

**Update Type** [Specimen collection or handling and/or storage changed](#)

### **SPECIMEN COLLECTION AND HANDLING CHANGE**

#### **Mycoplasma hominis PCR**

Order Code: MYCOH

Fee Code: 21626 (CPT 87798)

Reference Laboratory: Mayo MHRP

Effective October 10, 2023, respiratory fluid and body fluid specimens submitted for Mycoplasma pneumoniae PCR will no longer be accepted if sent in viral transport media. These fluids should be transported in a sterile container not containing media.

Collection Instructions: Send 1 -2 mL of fluid or respiratory specimen in a sterile container; send refrigerated (preferred) or frozen.

Acceptable fluids are pelvic, peritoneal, amniotic, prostatic secretions, semen, reproductive drainage or fluid, pleural or chest fluid, chest tube, and pericardial. Acceptable respiratory specimens are sputum, tracheal secretions, bronchial washings, bronchoalveolar lavage, lung, and nasal washings (note: nasal washings are accepted only for infants <3 months of age).
