

## **Test Update 892**

**Posted Date** 11/20/2024

**Effective Date** 11/19/2024

**Test Name** [Buprenorphine, Urine, Qualitative Screen](#)

**Update Type** [Test Methodology Changed](#)

**CPT Code** 80305

### **TEST METHODOLOGY CHANGE**

#### **Buprenorphine, Urine, Qualitative Screen**

Order Code: UBUP

Fee Code: 35999 (CPT 80305)

New Fee Code: JA063 (CPT 80307)

Effective November 19, 2024, the MLabs Chemistry Laboratory will begin performing the Buprenorphine, Urine, Qualitative Screen assay using the Roche Cobas C automated analyzer. This method utilizes an enzyme immunoassay, replacing the current lateral flow immunoassay test strip. The threshold for detecting buprenorphine will be lowered from 10 ng/mL to 5 ng/mL with the Roche method.

The screening assay provides a Positive or Negative presumptive result. The Buprenorphine and Metabolites, Urine, Quantitative LC-MS/MS assay (order code UBUPM) remains available for confirmatory testing.
