

Test Update 907

Posted Date 05/07/2025

Effective Date 06/10/2025

Test Name [Cutaneous Immunofluorescence Antibodies IgG, Serum](#)

Update Type [Miscellaneous](#)

CPT Code 88346, 88350

NEW TEST COMPONENTS AND REFLEX ALGORITHM

Cutaneous Immunofluorescence Antibodies, Serum

Order Code: CIFS

Fee Code: AA435, AA436 (CPT 88346, 88350)

Reference Laboratory: Mayo CIFS

New test components and a new reflex algorithm will be added to Mayo Clinic Laboratories Cutaneous Immunofluorescence Antibodies, Serum assay effective June 10, 2025.

Current test components include Cell Surface Antibody IgG, Basement Membrane IgG, Primate Esophagus IgG, and Primate Split Skin, IgG. New test components will include Cell Surface Antibody IgG, Basement Membrane IgG, Primate Split Skin, IgG, Cell Surface Antibody IgG4, Basement Membrane IgG4, and Primate Split Skin IgG4.

If IgG anti-cell surface or anti-basement membrane zone antibodies are present, then the IgG antibody titer (test ID CIFST) (CPT 88346, 88350) will be reflexed and performed at an additional charge.
