Test Update 935

Posted Date 12/17/2025
Effective Date 12/11/2025
Update Type Important Notification

MICHIGAN MEDICINE PROOFPOINT SECURE EMAIL

At Michigan Medicine, security and the protection of customer data is one of our highest priorities. Our aim is to always deliver a safe and secure experience, including when we communicate confidential information.

Effective December 11, 2025, Michigan Medicine has transitioned to Proofpoint encryption email for improved security against electronic eavesdropping, tampering and mail forgery. External recipients of encrypted emails will need to register with Proofpoint (creating a username and password) to view encrypted messages. This password will be used to access future encrypted messages.

Detailed instructions regarding how to access Proofpoint secure emails received from Michigan Medicine Laboratories can be found at Receiving of Proofpoint Encrypted email - Knowledge Portal
