Test Update 935

Posted Date 12/17/2025
Effective Date 12/16/2025
Test Name Oxycodone and Metabolites, Serum
Update Type New Tests
CPT Code 80365/G0480

NEW TEST

Oxycodone and Metabolites, Serum

Order Code: FOXFU

Fee Code: 32155 (CPT 80365/G0480)

Reference Laboratory: Mayo FOXFU (NMS Labs 3270SP)

New Order Code: MMLR

New Reference Lab: Mayo OXYDS

Mayo Clinic Laboratories began offering Oxycodone and Metabolites, Serum (Mayo ID OXYDS) effective December 16, 2025. This test is used for monitoring therapeutic efficacy/compliance in serum specimens of patients who are prescribed oxycodone and/or oxymorphone and replaces Mayo test ID FOXFU forwarded to NMS Labs.

Collection Instructions: Collect specimen in a red top tube; do not use SST. Centrifuge, aliquot 1 mL (minimum 0.5 mL) of serum into a plastic vial, and refrigerate.

Reference Range:

Therapeutic range/Metabolite information (as applicable):

Oxycodone: 10-100 ng/mL

Noroxycodone: Metabolite of oxycodone

Oxymorphone: Metabolite of oxycodone; 1.0-8.0 ng/mL when used as sole therapy

Noroxymorphone: Metabolite of oxymorphone

Cutoff concentrations: Oxycodone: 1.0 ng/mL, Noroxycodone: 1.0 ng/mL, Oxymorphone: 1.0 ng/mL, Noroxymorphone: 1.0 ng/mL.
