Test Update 949

Posted Date 03/25/2026
Effective Date 04/06/2026
Test Name Hereditary Erythrocytosis Mutations
Update Type Miscellaneous
CPT Code 81404, 81405, 81479

NEW SENDOUT TEST

Hereditary Erythrocytosis Gene Panel, Next-Generation Sequencing

Order Code:	NHEP
Fee Code:	TBD (CPT 81404, 81405, 81479)
LOINC:	103735-7
Reference Lab:	Mayo NHEP

Effective April 6, 2026, Michigan Medicine Laboratories Sendout Lab will go live with a new sendout test, Hereditary Erythrocytosis Gene Panel, Next-Generation Sequencing. Refer to Test Update 945 for collection instructions. This test is a reflex for Erythrocytosis Evaluation (TEST ID REVE2, also sent to Mayo Clinic Laboratories), but it can also be ordered independently. If the hemoglobin testing results from REVE2 do not explain the patient's phenotype/hereditary erythrocytosis, the next-generation sequencing gene panel for hereditary erythrocytosis will be performed as a reflex at an additional charge. An individual interpretive report will be provided.
