ANATOMIC PATHOLOGY CONSULTATION REPORT

Order Number:	OC-20-8573	Referred by:	
First Name:	JOE	DR. BAKER	
Last Name:	SMITH	GENERAL HOSPITAL	
MRN:	123456789	123 MAIN ST.	
Gender:	Male	Age: 53 Y	DOB: 11/1/1966
Date Received:	04/20/2020	ANYWHERE, MI 48000	
Date Completed:	04/21/2020		

DIAGNOSIS:

- Right parotid, fine needle aspiration cytology and cell block (C20NY1-0063593, 3/19/2020): Warthin tumor. See comment.

Dear Dr. Baker-

Thank you for sharing this interesting case. I agree with the diagnosis of Warthin tumor. Smear slides and cell block show a mix of bland oncocytic epithelium, lymphocytes, and acellular debris, consistent with the diagnosis. If you have any questions or concerns, please do not hesitate to contact me.

Sincerely,

Richard Cantley, M.D.

Laboratory Accrediting Agency Compliance Statement:

If immunostain testing was performed on this case, the testing was developed and the performance characteristics were determined by the University of Michigan Clinical Immunoperoxidase Laboratory. It has not been cleared or approved by the U.S. Food and Drug Administration. (The FDA has determined that such clearance is not necessary. This test is used for clinical purposes. It should not be regarded as investigational or for research.) Appropriate negative and positive controls were run and demonstrated expected results. Most antibodies (including ER, PR, and HER2/neu) were not validated on decalcified tissues; negative staining on decalcified specimens should therefore be viewed with discretion, as a falsely negative result cannot be excluded. The Coreo ACIS instrument (if used for any test on this case) is FDA approved.

Performing site:

NCRC
NCRC Department of Pathology and Clinical Laboratories
2800 Plymouth Rd., Building 35
Ann Arbor, MI 48109
